**Model Rules of Professional Conduct** American Bar Association. House of Delegates,Center for Professional Responsibility (American Bar Association),2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

**Proliferative Vitreoretinopathy (PVR)** H. MacKenzie Freeman, Felipe I. Tolentino, 2012-12-06 The purpose of this book is to provide an update both on the present management of proliferative vitreoretinopathy (PVR) and on clinical and experimental research being done to control this disease. The book is divided into three parts. The first part deals with the current management of PVR. The Retina Society Classification of PVR is based in part on a gradation of severity from minimal to massive; therefore, this book attempts to correlate the management of PVR with its severity. The treatment of PVR of varying degrees of severity, from mild to the most severe form, is described by those authors with extensive experience with this spectrum of cases. Much progress has been made in the management of severe PVR as a result of vitreous injections, vitrectomy, periretinal membrane surgery, and retinal surgery. Authors in this book show that in mild and moderately severe PVR excellent results can be obtained with techniques that are less invasive and possibly less likely to stimulate further abnormal cellular proliferation. The new modalities for treatment of PVR are discussed by authors having extensive experience with them. The current status of pharmacological treatment and new concepts of the pathobiology of PVR are discussed. The second part of the book deals with questions frequently encountered in the management of PVR. These questions are answered by a panel of experts including Gary W. Abrams, Steven T. Charles, William H. Havener, Robert Machemer, Charles L. Schepens, and Walter H. Stern.
