It is a reflection of the author's more than 40 years of experience in medical and cancer research, and is written in a colloquial style to reach not only the young audience who are considering devoting their lives to biomedical research, but also to those who are already engaged in this field. The author emphasizes the unique traits and qualifications required for performing scientific research and also describes the different modalities which can be performed in our actual scientific environment. There are numerous practical advices in this book, such as guidelines on writing a grant proposal and the first peer-reviewed manuscript, the selection criteria of the training laboratory and mentors, as well as keeping records of experimental data. The author also provides his insight on the personal inner drive and motivation critical for conducting scientific research, as well as the importance of working on a problem without losing the human perspective of this specific and unique human endeavor.

Why the Left Loses Kennedy, Paul,Manwaring, Rob,2018 Around the world, parties of the left and center-left have been struggling, losing ground to right-wing parties and various forms of reactionary populism. This book brings together a range of leading academics and experts on social democratic politics and policy to offer an international, comparative view of the changing political landscape. Using case studies from the United Kingdom, Germany, Spain, France, Australia and New Zealand contributors argue that despite different local and specific contexts, the mainstream center-left is beset by a range of common challenges. Analysis focuses on institutional and structural factors, the role of key individuals, and the atrophy of progressive ideas as interconnected reasons for the current struggles of the center-left.

Participatory Evaluation Deepa Narayan-Parker,1993-01-01 Printed on Demand. Contact books@worldbank.org, if currently unavailable. World Bank Technical Paper 207. Development projects that encourage direct community participation ususally meet with greater success than those that do not. This guidebook describes ways of letting poor people help monitor and evaluate the water and sanitation programs that serve them. It provides simple shortcuts for building community participation and consensus. Decisionmakers will learn the different risks posed by this approach, such as viewing community participation as a panacea. The study describes ways to set reasonable goals without discouraging unexpected progress. It provides a handy framework of key indicators that can be used to monitor progress. These indicators gauge a project's cost, sustainability, and effectiveness. They rate a community's abiltiy to expand services and handle more operating responsibilities. Cash-transfer Programming in Emergencies Pantaleo Creti, Susanne Jaspars, 2006 In emergencies, distributing cash in a targeted manner can often meet people's immediate needs more quickly and appropriately than the direct distribution of commodities such as food aid. Cash gives people choices and thereby preserves their dignity. Commodity distribution may pose logistical problems, takes time, and in the case of food aid, may disrupt local markets if food is actually available within the affected country or region. But among humanitarian agencies there are fears that cash transfers will pose security risks, create inflation, and fail to be used to meet basic needs. In this guide, the first of its kind, Oxfam staff members present the rationale behind cash-transfer programs, considering the arguments for and against cash as an alternative to commodity distribution. They also give guidance on when cash is the most appropriate intervention and how to assess this. Different types of cash intervention are compared--cash grants, vouchers, and cash-for-work--and the guide uses checklists to explain the practical steps involved in implementing them. They draw on the experience of Oxfam and other agencies of operating such programs, including responses to the devastation caused by the Indian Ocean tsunami in December 2004. The guidelines are primarily intended for NGO personnel: humanitarian program managers, food-security specialists, public-health engineers, finance staff, and logisticians. Policymakers in donor organizations and international agencies will also find them relevant. The sixteen cards contain key elements from the book to explain how to assess whether cash is the most appropriate response to any particular emergency. The cards and the paperback are also available as a set.

City of Dragons Kelli Stanley, 2010-01-29 February, 1940. In San Francisco's Chinatown, fireworks explode as the city celebrates Chinese New Year with a Rice Bowl Party, a three day-and-night carnival designed to raise money and support for China war relief. Miranda Corbie is a 33-year-old private investigator who stumbles upon the fatally shot body of Eddie Takahashi. The Chamber of Commerce wants it covered up. The cops acquiesce. All Miranda wants is justice--whatever it costs. From Chinatown tenements, to a tattered tailor's shop in Little Osaka, to a high-class bordello draped in Southern Gothic, she shakes down the city--her city--seeking the truth. An outstanding series debut.
